

Brandt Builds New LEED Gold Headquarters Building

Brandt, a \$250M privately held mechanical and electrical construction firm, has relocated its company headquarters to a newly renovated LEED Gold facility in Carrollton. Founded in 1952 and currently employing over 1500 employees in Texas, Brandt is a recognized leader in environmentally-conscious building systems.

Carrollton, TX-October 5, 2009 – Brandt, Texas' largest mechanical and electrical contractor, has relocated its company headquarters to a newly renovated facility in Carrollton and is seeking LEED Gold certification. Company owners Mark Zilbermann and Barry Moore are committed to implementing new and emerging "green" technologies in the facility that underline the company's commitment to "building a sustainable future" for our next generation.

Rain water harvesting, solar water heating, and 250 ft thermal wells for air conditioning are just of a few of the technologies Brandt has implemented to reduce building operating costs and preserve the environment. All of these sustainable technologies can be implemented in the markets that Brandt serves- Healthcare, Education, Industrial, Office, Hospitality, and Critical Environments- to help these customers operate at reduced costs with less impact on the environment.

Brandt's new facility includes production and support facilities that employ skilled craftsmen from the plumbing, piping, sheet metal, electrical, and HVAC trades that operate on Brandt's core values of Care, Integrity, Perseverance, and Agility. With more than 55 years of experience, Brandt's knowledge of building systems is unmatched. Using its proven knowledge and engineering expertise, Brandt can help any building become more energy efficient – reducing operating costs, increasing energy efficiency, and reducing the carbon footprint.

About Brandt:

With offices in Dallas, Fort Worth, Waco, Austin, and San Antonio, Brandt designs, builds, services, and retrofits energy-efficient building systems. With proven engineering and technical services, the company is dedicated to helping customers lower operating costs and increase energy efficiencies in new and existing buildings. Brandt's goal is to provide responsive and reliable solutions with professional, competent employees, one customer at a time.
